Accounting Department - Student Learning Outcomes

Accounting professionals are looked upon as trusted business advisors and must develop and maintain high standards of professionalism, ethics, and technical competency. Irrespective of the interest area in which the individual works, be it accounting and bookkeeping, auditing, tax, or consultation, accountants are expected to be able to: **identify** relevant issues; **gather** information related to those issues; **compile and synthesize** that information into a format useful for its intended users; and **communicate or report** the results in an effective and reliable manner. Therefore, it is important that we as educators instill those competencies into our students. Upon completion of an accounting degree at Dixie State University, students will demonstrate the ability to:

1. **Identify:** identify accounting, tax, auditing and ethical issues in structured and unstructured fact-based situations.
2. **Gather:** perform research using the professional body of knowledge in the accounting discipline.
3. **Compile/Synthesize:** use a range of techniques to perform analysis, synthesize information and draw conclusions.
4. **Communicate/Report:** communicate effectively in quantitative and qualitative terms through writing and speaking.
